

Assignment

Question 1:

Create the account the using Sign up option

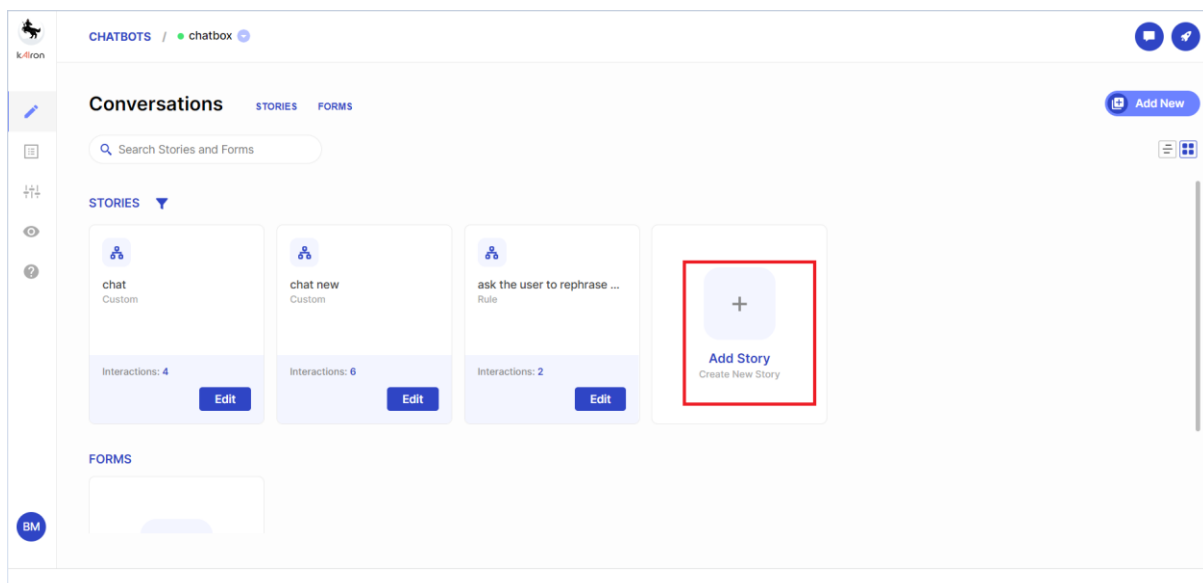

After that login into the account

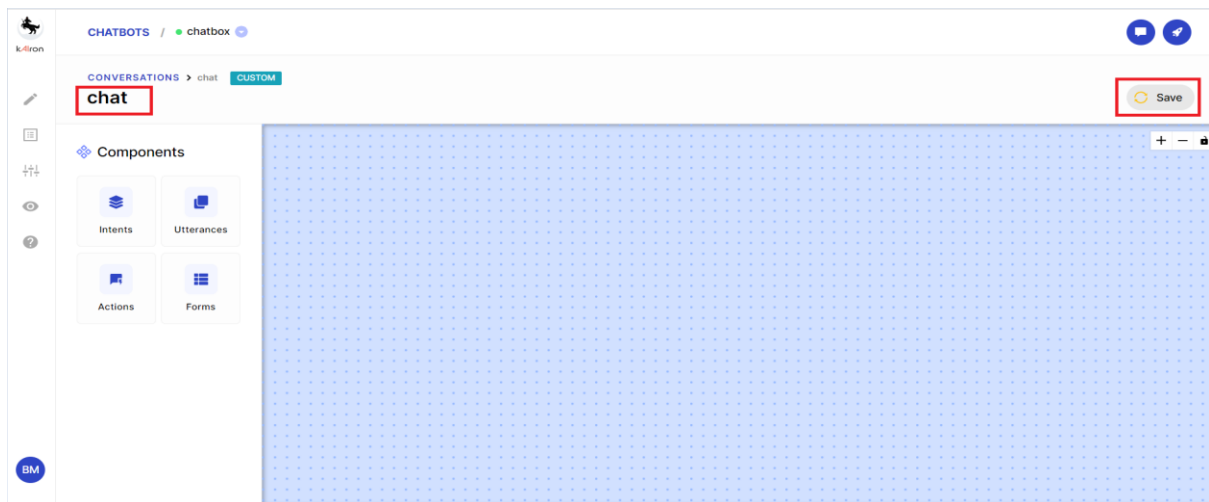

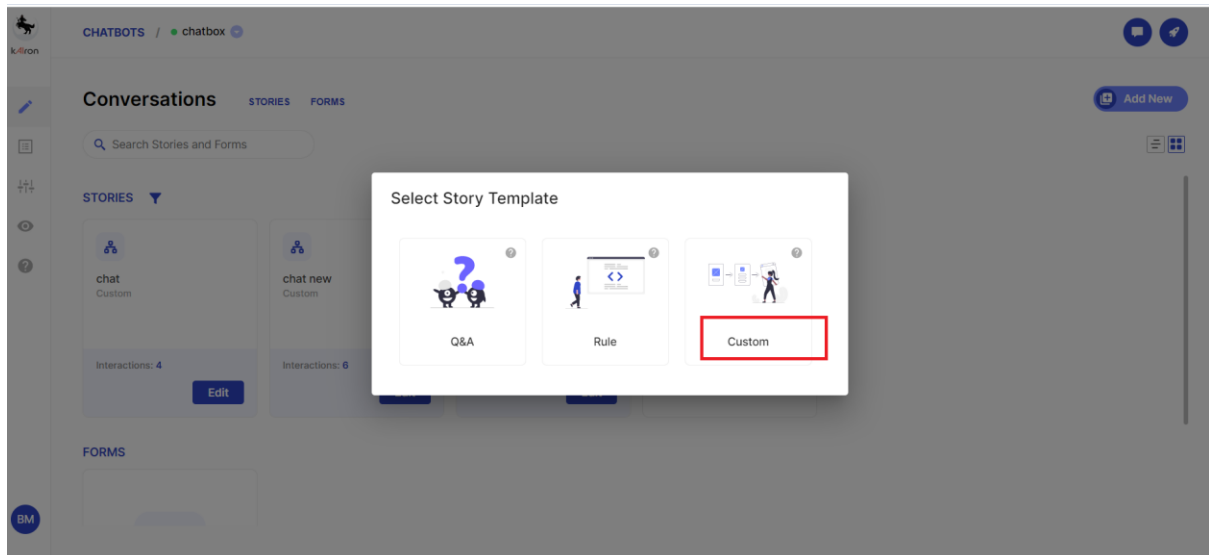

Click Create chat bot option add name and save

Click on view option it will go to the conversations page

click on add story and select story template as custom and give name to that conversation and save

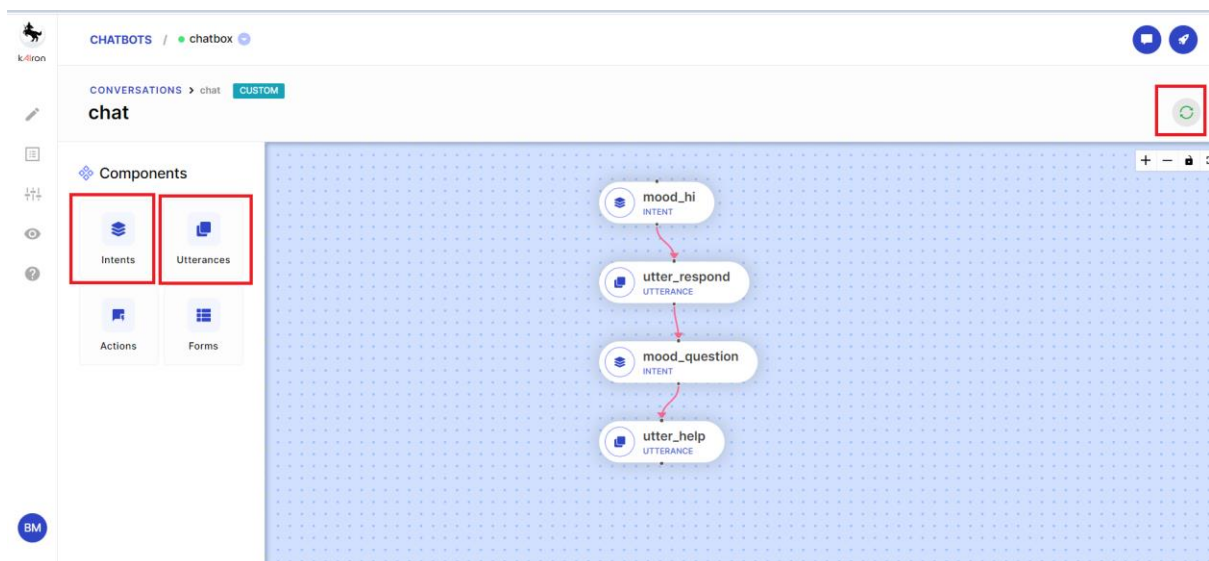

select intents then create intents

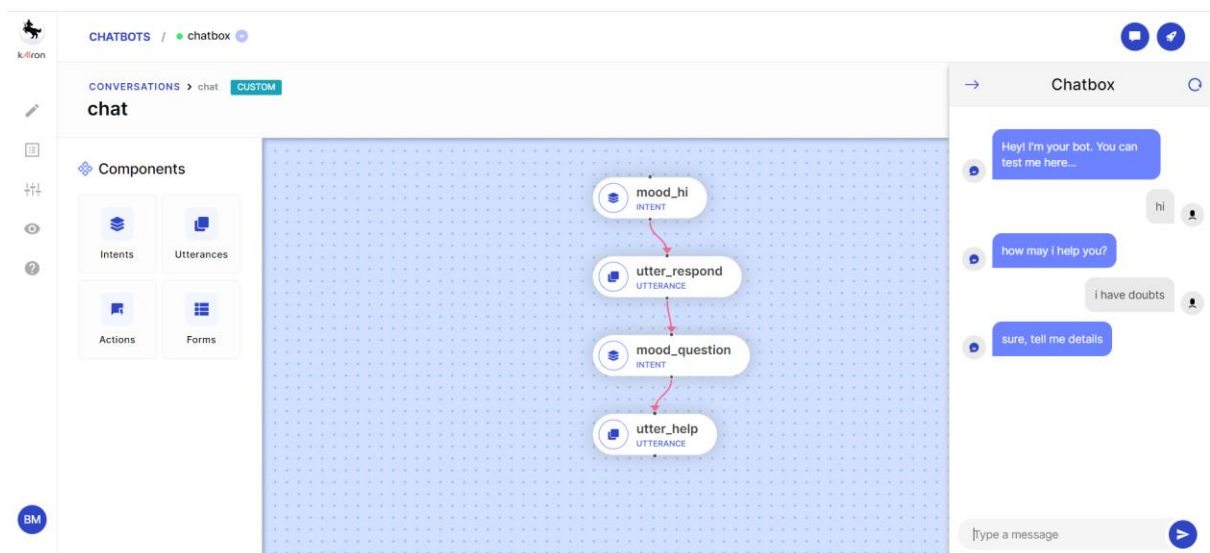

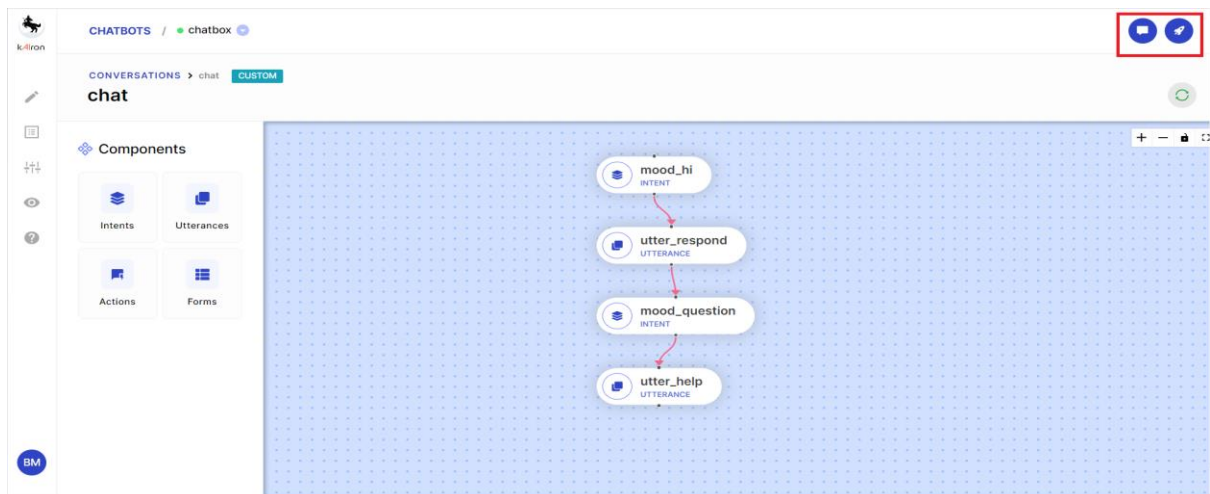

select Utterances then create intents

add intents and Utterances flow

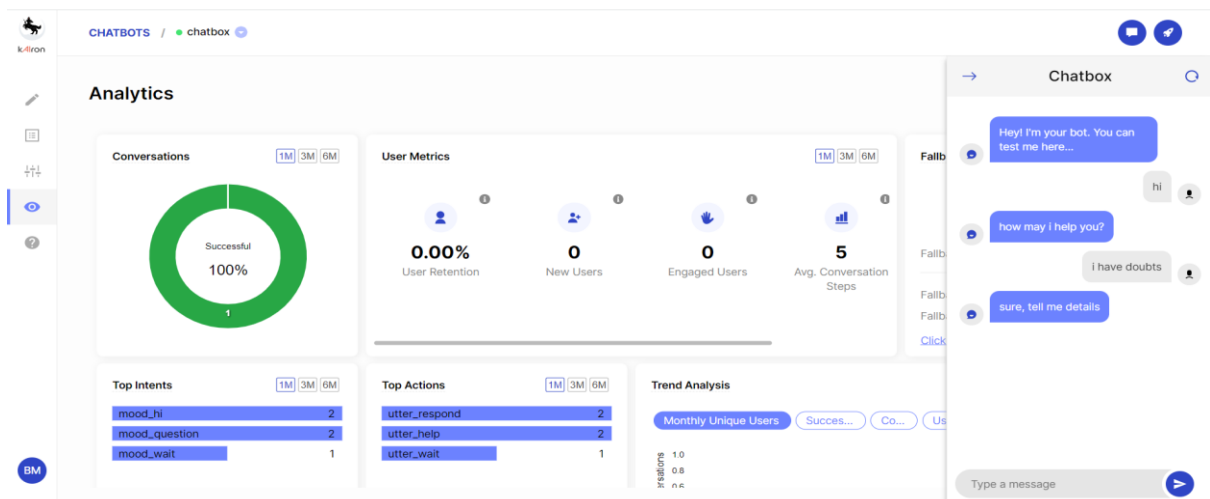

Click on Train bot wait up to training as completed

finally test the bot

after that click on logo choose Monitor=>Analytics then conversations shows successful percentage.
